Maverick Industries, we deliver safe, reliable, and predictable outcomes in live, complex environments.

Maverick Industries delivers disciplined construction, civil, demolition, remediation and multi-trade maintenance services across utility, government and commercial sectors. **Maverick Industries has delivered high-quality civil, construction and project management services across NSW since 2014**, and is trusted to operate in high-risk, high-security live environments. Our teams combine practical field experience, effective supervision and robust QSE systems to deliver predictable outcomes where continuity, safety and compliance are essential.

“When I started Maverick, my goal was simple: build a team that could take real pride in the work they do.” — Managing Director, Daniel Hatchett

Maverick’s Values

Our values guide and shape the way we communicate, how we make decisions and how we work as a team so that we can consistently deliver results for the people who rely on us.

Communication - We communicate clearly, consistently and respectfully with our clients, our teams and the communities in which we operate.

Integrity - We do what we say we will. Honesty, transparency and respect guide every decision.

Accountability - We take full ownership of project delivery, together with the safety, environmental and quality outcomes that underpin it. When we commit to a task, we honour that commitment, supporting one another to achieve the results our clients expect and rely on.

Core Capabilities

End-to-end delivery across the asset lifecycle

- **Construction Works** — reinforced concrete, structural steel, precast, formwork, building fabric and fit-out.
- **Civil Works** — bulk earthworks, detailed excavation, pavements, drainage, retaining structures and utilities coordination.
- **Demolition & Hazardous Removal** — controlled demolition, asbestos management (Class B licence) and coordination with Class A partners for friable asbestos removal.
- **Roofing Replacement & Repairs** — metal and membrane systems, leak remediation, flashing and waterproofing.
- **Fire Door Replacement & Certification** — removal, replacement, hardware upgrades and audit-ready certification.
- **Building & Facility Maintenance** — routine and reactive maintenance, painting, fencing, security upgrades, relocations and minor fit-outs.
- **Physical Security Upgrades** — access control, CCTV, perimeter works and secure fencing.
- **Precast & Modular Assembly** — offsite fabrication and onsite assembly to reduce program risk.
- **Specialist Access & Temporary Works** — scaffolding, propping, confined-space entry and temporary traffic management.

Delivery Approach and Systems

Integrated, risk-based and auditable delivery

- **Planning & Coordination:** The bid team and the site delivery teamwork work through the scope from site establishment to demobilising, documentation handover and everything in-between. Stakeholder management allows the team to ensure effective consultation with no fuss delivery.
- **Risk Management:** risk-based sequencing to protect live assets, the community, workers, asset owners/ operators and maintain operational continuity. We thrive in complex environments.
- **Quality Assurance:** Our approach combines NATA-aligned testing regimes, survey verification and fully documented inspection and test plans. Clear hold points and witnessed inspections support a collaborative delivery process that meets client expectations every time. The way we work — and the quality of our document handover — builds confidence, trust and long-term relationships.
- **Safety Management:** We provide a safety system that is logical, practical and designed with intent and outcomes at its core. Everyone deserves to go home as they arrived. Our strong reporting culture, supported by ICAM investigations, drives continual improvement across all projects.
- **Environmental Management:** We work closely with clients to identify and agree on project-specific environmental controls that are practical, compliant and easy to implement. Maverick's EPA licence for the transport of Category 1 and 2 trackable waste strengthens our ability to manage, maintain and verify environmental controls throughout delivery.
- **Operational Experience:** authorised to work in live substations, government precincts and other restricted environments with strict access and security protocols.

Licences, Accreditations and Awards

- **AS/NZS ISO 9001 Quality Management**
- **ISO 45001 Safety Management alignment**
- **AS/NZS ISO 14001 Environmental Management**
- **Restricted Demolition Licence** (AD212708)
- **EPA Licence** — Transport of Category 1 & 2 Trackable Waste (21913)
- **Class B Asbestos Licence** (works with Class A licensed contractors for friable asbestos removal)
- **NATA testing regimes** for materials and compaction verification
- **Avetta Safety Star Award** (2025) and **Avetta Innovation Champion** recognition (2026)

Clients and Sectors

- Representative clients: Ausgrid, Downer, BGIS, Cushman & Wakefield, Parliament House.
- Sectors served: Utilities, Government, Heritage, Industrial, Commercial and Critical Infrastructure.

Where we Work

We have multiple teams and contract partners in Sydney and metropolitan areas, and we also deploy in regional NSW on a regular basis.

Projects

Department of Defence

Victoria Barracks
Refurbishment of the VIP accommodation in Paddington Barracks, Sydney .
